The Keeping Place

Software to protect culture and manage Country

The Keeping Place is a **GIS based cultural heritage and land management system.**
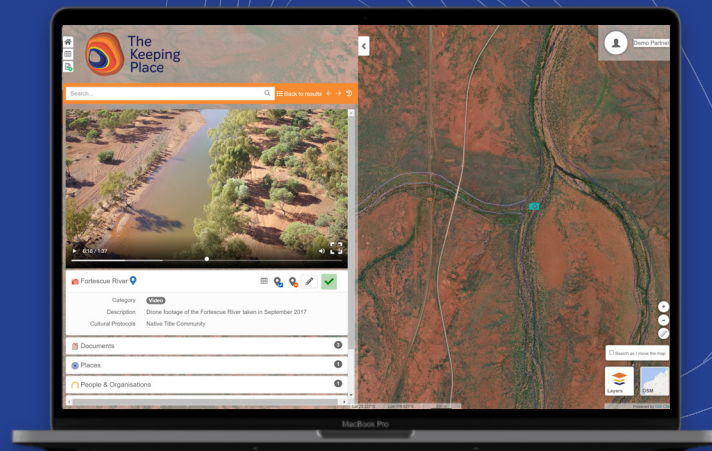

- **Protect cultural knowledge**
- **Manage cultural heritage**
- **Manage native title**

Capabilities for culture, Country and community

One place to keep **everything**

The software was specially designed for native title groups and Indigenous ranger programs. It's a geospatial platform to digitally store, protect and share cultural knowledge. It's also a complete business tool, helping Traditional Owner groups and their representatives to manage and protect their rights and interests in land.

Protect cultural knowledge for future generations

Images and photos.

Sound recordings, such as songs and stories.

Video recordings and drone footage.

Site mapping, including the location of significant sites.

Documents, such as heritage reports, cultural heritage management plans and research projects.

Spatial data, such as land tenure and environmental data.

All-in-one solution for Traditional Owner groups

Establish a private and secure digital cultural centre

Collect, store and share documents, stories, songs, images and videos. Migrate and return cultural and heritage information held by other parties into one place.

Protect cultural sites and manage heritage surveys

Map cultural sites and protected areas. Select locations of interest in GIS-based maps. Plan and manage cultural heritage surveys and land management projects.

Manage agreements and obligations

Manage and monitor commitments set by land use agreements and cultural heritage management plans. Track obligations using automated workflows and notifications.

Access land and environmental data in near real-time

Access various public and restricted spatial datasets from various government agencies in near-real time.

Manage stakeholders and membership information

Record and log stakeholder information, correspondence and interactions. Manage membership lists, including skills, training and certificates.

Manage future acts and negotiations

Receive automated notifications about mining leases and other future acts. Manage responses to future acts through a workflow and reminder system.

Improve governance and decision-making

Search and view the information you need to manage Country all in the one place. Use maps to visualise data and make informed decisions about land.

"The Keeping Place is important because it means we now have a program that can keep hold of our knowledge, language, and stories. The information can be looked after by our corporation and preserved for future generations"

Brian Tucker – Nyiyaparli Traditional Owner

The Keeping Place can be tailored to suit the unique cultural and business needs of your organisation. **Talk to our team today to find out more.**

About
The Keeping Place

Who we are

We are an Indigenous-owned and led, not-for-profit organisation and social enterprise.
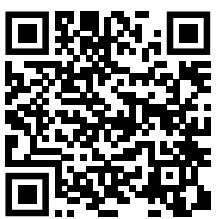

What we do

We support Traditional Owners and their representatives to protect cultural knowledge, manage Country and regain data sovereignty through a culturally considerate software platform.

Why we do it

We believe in empowering Aboriginal and Torres Strait Islander people, communities, and organisations with innovative digital technology to realise new social and economic opportunities.

Empowering and building the capacity of Traditional Owner groups across Australia.
